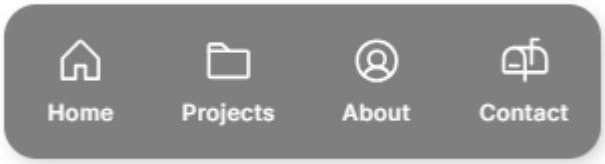
⭐Navigation Bar

https://www.framer.com/marketplace/components/floating-nav/



Let's have this style of nav bar stickied to the top middle of the page. Each button just moves the screen down/up to that component

Transparent, minimal, and modern

⭐Hero Section

https://nakula.framer.website/?utm_source=framer

What to copy:

- Logo+Text starts big, and goes small as you scroll down
- Hero image in the middle **(to be created)**
- Two CTA buttons - one in nav bar (top right), one in the hero section **(location TBD)**
- Header text
    - Start-Up apps and websites, built by fellow Start-Up founders
-

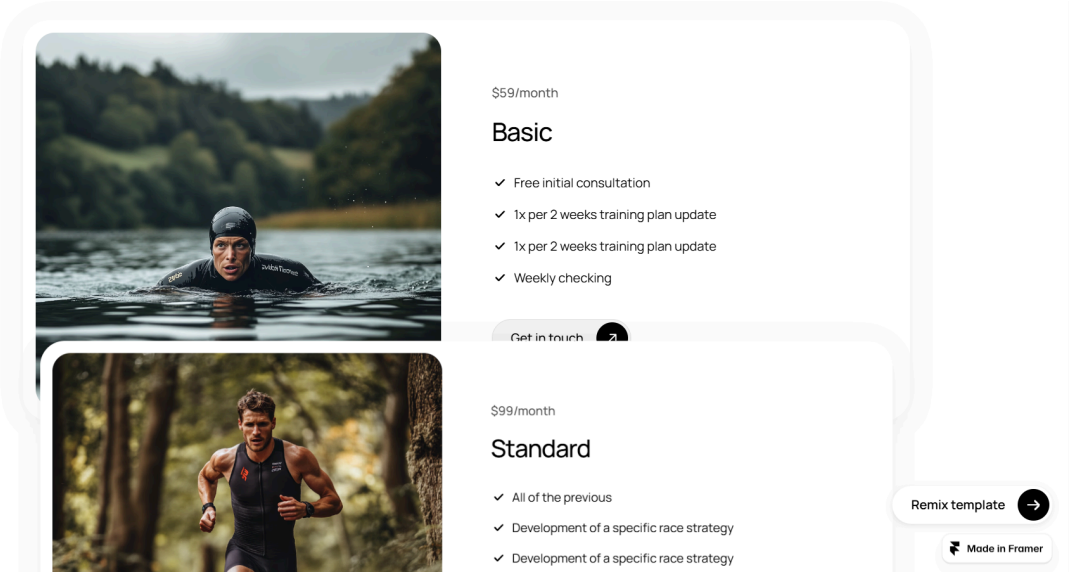
⭐Services

https://nakula.framer.website/?utm_source=framer

Text highlights as user scrolls down

Your technical co-founder, combining both business strategy and software engineering to turn your idea into a successful business.

⭐Proof Credibility



https://perform.framer.website/

Let's use the scrolling overlapping card component from this website, with each card having a product that we're working on:

- Icon Training
- Basenote Solutions
- Anything else you can think of… Maybe we need to speak to Taseen, see if we can put Freedom Airlines or something on here

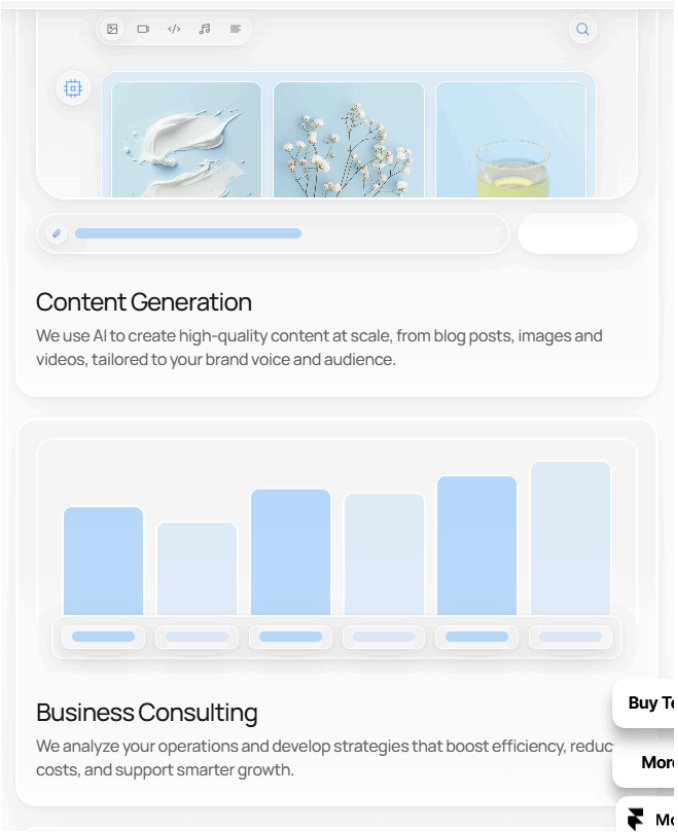
Just stick some placeholder text on the cards, and I'll create the copy later

⭐How It Works

https://darling.framer.website/

Can we use an interactive timeline effect here, so as the user scrolls down, the line animates down too

Rather than large images, we'll have three cards - possibly with this kind of style:



https://calisto.framer.website/

Very minimal animations on each card

1 — Understand
We learn your idea, business model, and goals.

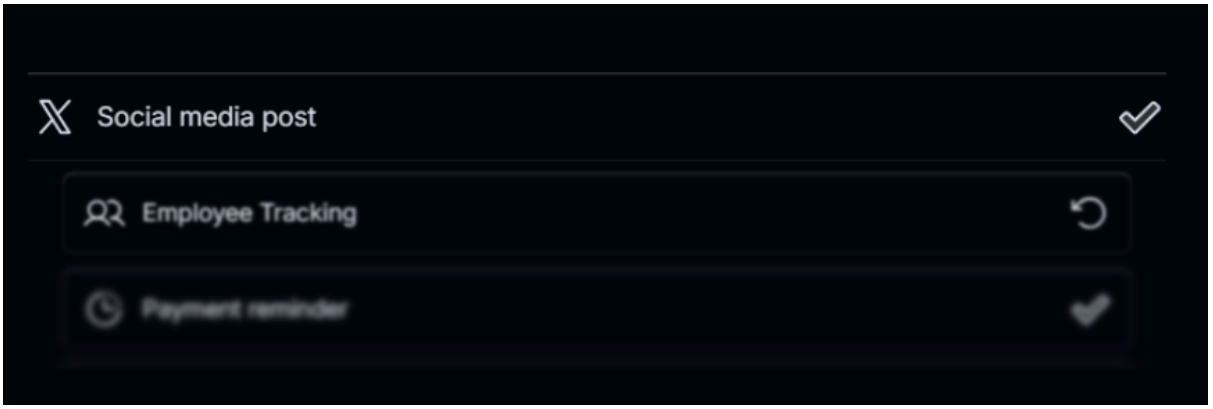
2 — Plan & Build
We shape the product strategy and build the right solution.

3 — Launch & Grow
We launch with you and support the next stage.

I'll provide better copy later

⭐Why Choose Us

https://landio.framer.website/



Let's have something like this, but instead of it being animated, whichever box is clicked unblurs. Hope that makes sense

Here's some placeholder copy:

Technical co-founder mindset
We care about outcomes, not tickets.

Strategy + development
We help shape the business, not just build features.

Founder-friendly approach
Clear communication, no technical jargon.

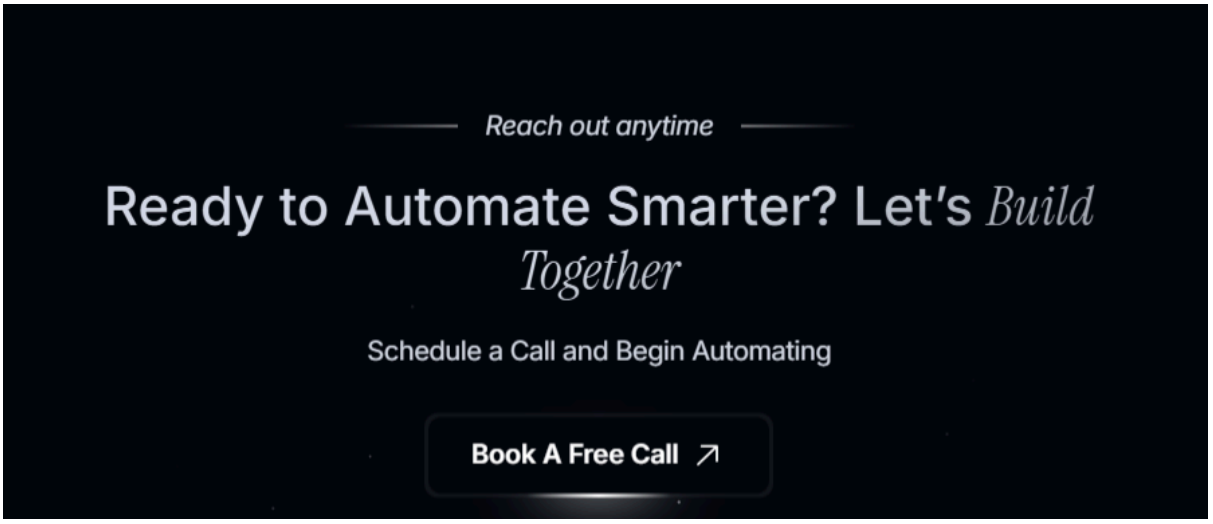
Lean and fast
Ship early, learn quickly.

Long-term partner
We stay involved after launch.

Built for non-technical founders
We translate ideas into real products.

⭐Contact CTA

http://landio.framer.website/



Perhaps we have two buttons, one for Book a Free Call (we can link it to my calendly link) and one for a contact form pop-up
